

Prof. Dr. Grit Behrens

Prof. Dr. Frank U. Hamelmann

Activities of Solar Computing Lab- Photovoltaic Research at Campus Minden

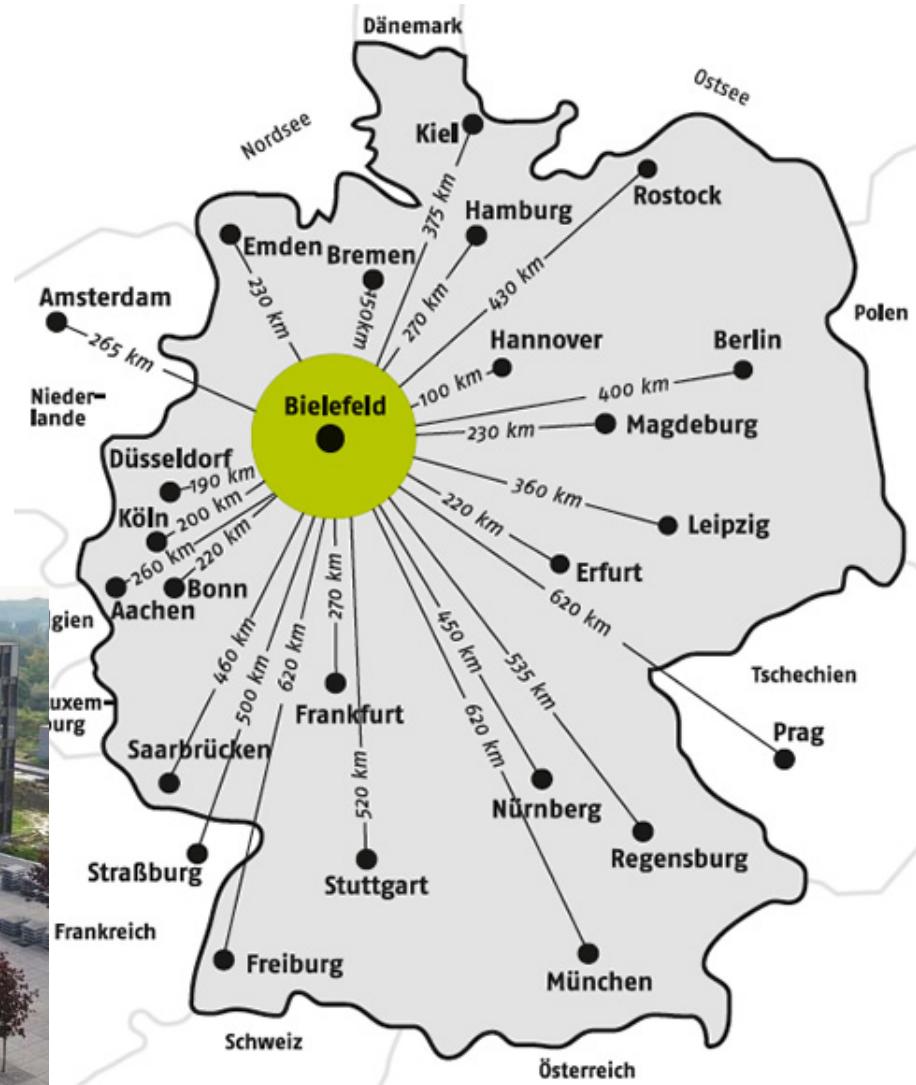

April 2016

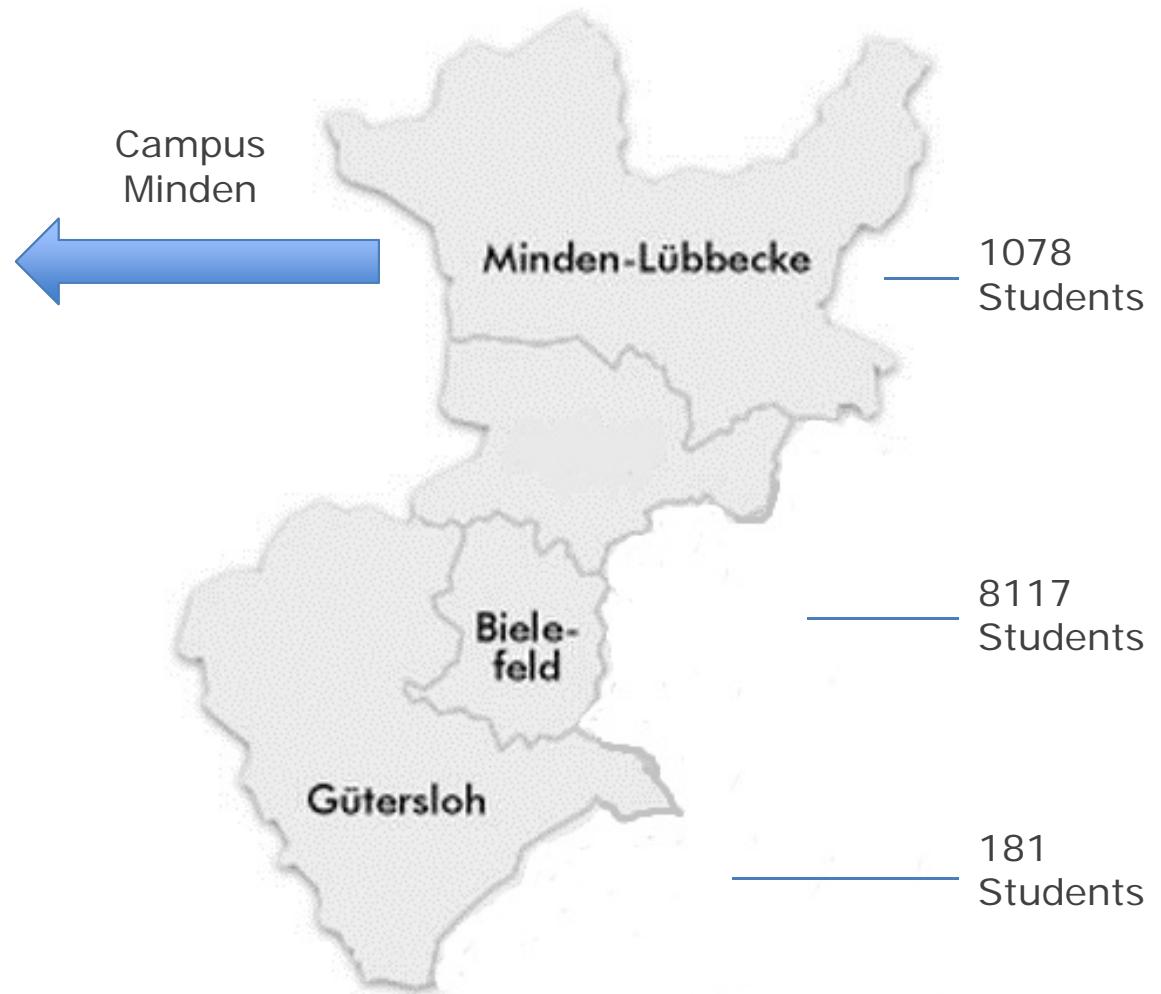

FH Bielefeld
University of
Applied Sciences

- 1. Location at Campus Minden**
2. Solar Computing Lab – persons and facilities
3. Solar Computing Lab – projects and activities

Bielefeld University of Applied Sciences

Bielefeld University of Applied Sciences – 3 Locations

1. Location at Campus Minden
2. **Solar Computing Lab – persons and facilities**
3. Solar Computing Lab – activities

Solar Computing Lab-Persons

**Frank U. Hamelmann**

Prof. for Physics
Thin Film Technologies
and Photovoltaics
frank.hamelmann@fh-bielefeld.de

**Grit Behrens**

Prof. for Applied Computer Sciences
Web Based Applications and
Applied Artificial Intelligence
grit.behrens@fh-bielefeld.de

SCL: Facilities

- **Interdisciplinary cooperation between physics and computer sciences in research and education**
- **Outdoor test facility** for PV-modules
- **Weather station**
- **Pyrheliometer** (insolation diffuse, direct)
- PV-field on roof top for study and research
- Redox-Flow-storage
- Taylormade **efficient database** for all measurements
- Web based **Monitoring System** for vizualisation and **scientific data analysis (Maschine Learning Algorithms)**
- **IR- Camera, EL-Camera -system**
- **Kopters**

Solar Computing Lab

Outdoor-Test -Laboratory: PV-Modules

Continuously measurements of

- U/I-curve for MPP tracking every minute
- Current, voltage, performance, module-temperature every 10 sec.

Solar Computing Lab

Outdoor-Test-Laboratory : Weather Station

- Every 10 seconds
- humidity , wind force, rainfall, air pressure, air temperature
- Irradiation: global, direct, diffuse

Anlagenstatus - Wetterstation

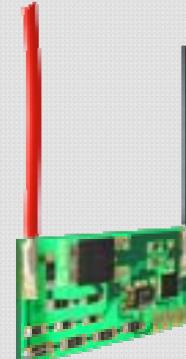

Systemzeit: 03.07.2013 12:15:08

Name	H1420026
Zeitstempel	03.07.2013 12:14:18
Seriennummer	H1420026
Windrichtung min.	239 °
Windrichtung avg.	239 °
Windrichtung max.	239 °
Windgeschw. min.	0,6 m/s
Windgeschw. avg.	0,6 m/s
Windgeschw. max.	0,7 m/s
Luftdruck	1 000,7 hPa
Aussentemperatur	22,6 °C
Gerätetemperatur	23,8 °C
Luftfeuchtigkeit	63,1 %
Regenmenge (Tag)	2,4 mm
Regendauer (Tag)	1 260 s
Regenintensität	0 mm/h
Hagelmenge (Tag)	0 hits/cm²
Hageldauer (Tag)	0 s
Hagelintensität	0 hits/cm²/h
Max. Regenintensität	36,5 mm/h
Max. Hagelintensität	0 hits/cm²/h

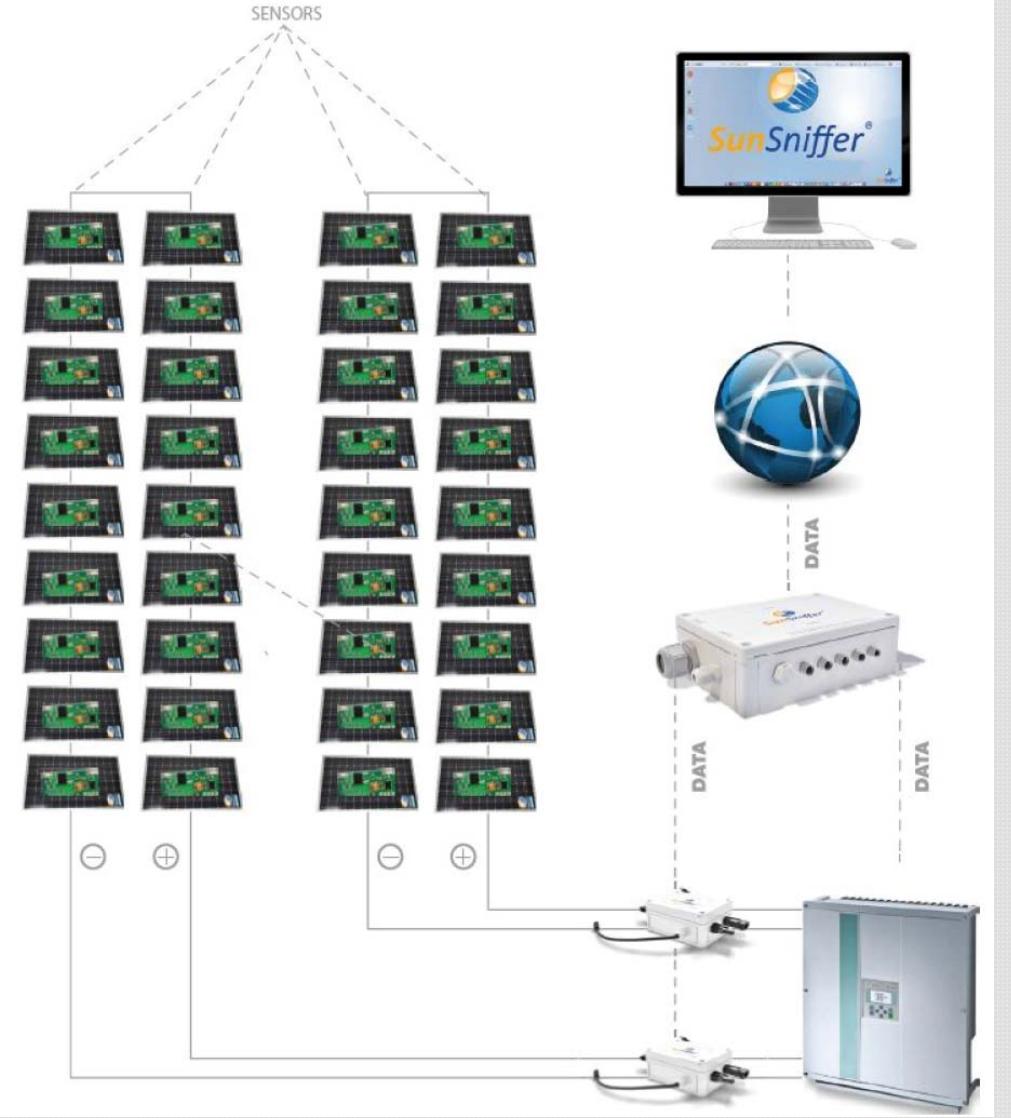

Intelligentes Monitoring

AEG
perfekt in form und funktion

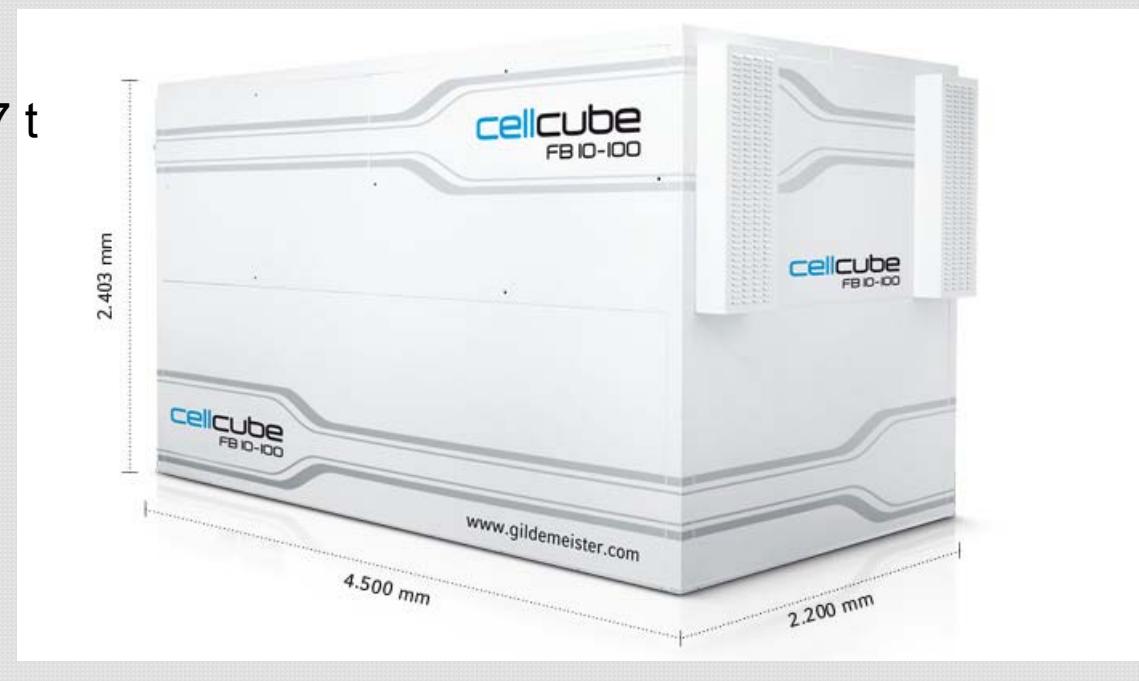

- Polykristallines Modul von AEG
- 16% Wirkungsgrad
- **Sunsniffer®-Technologie**
 - Modulgenaue Leistungs- und Temperaturmessung
 - Datenversand per DC-Verkabelung
 - Integriert in Anschlussdose

Der Vanadium Redox-Flow-Speicher

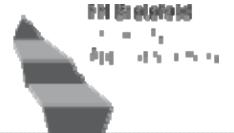

- Typ: Gildemeister CellCube FB 10-100
- performance: 10 kW
- capacity: 40 kWh
- control : Bus-System, TCP/IP
- efficiency factor: until 80%
- no Self-discharge in the vanadium tanks
- resistant on deep discharge
- cykles: over 100.000
- Size : 4,66 x 2,20 x 2,42 m
- weight (incl. Vanadium liquid): 7 t

1. Location at Campus Minden
2. Solar Computing Lab – persons and facilities
3. **Solar Computing Lab – projects and activities**

SCL: activities and projects

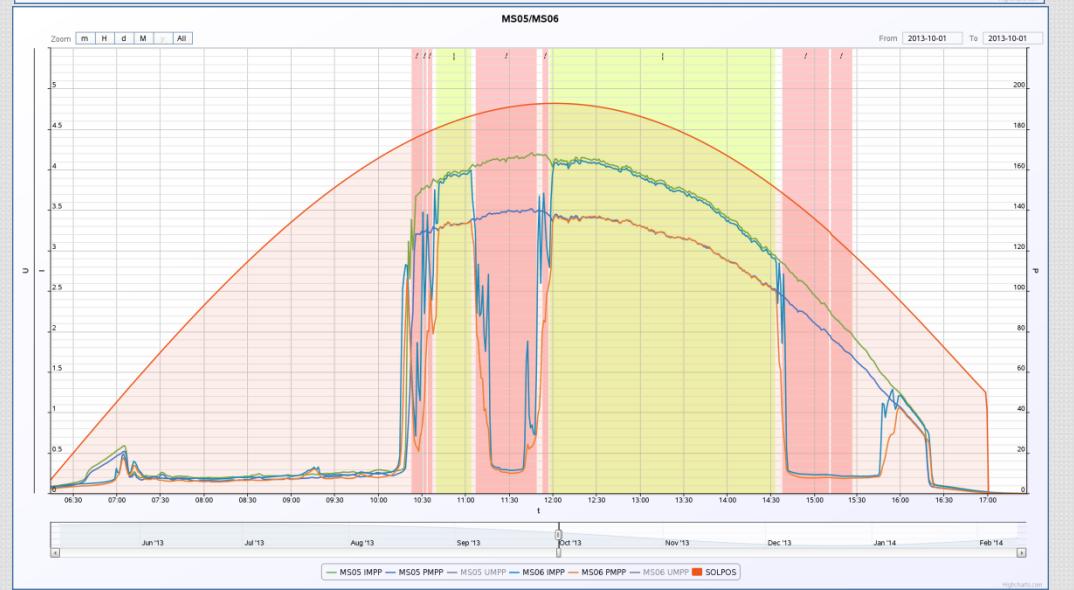

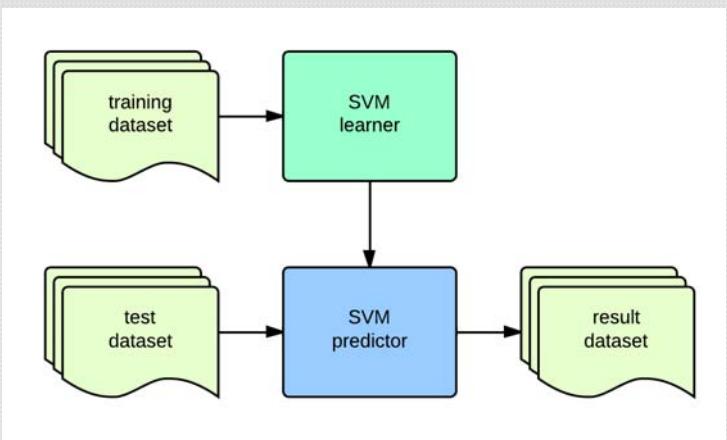

- Simulation of **long term yield prediction**
- Short term yield prediction **based on weather forecast**
- Development of **automatic fault detection** with methods **of Machine learning with Big Data Technology**
- **Image Processing and pattern recognition on IR and EL images** and videos
- **3D-Thermography**
- **Flight assistance** for IR and EL-copters
- **Low Cost Electroluminescence-** picturing by **daylight** in industrial PV-fields
- **Development of mobile application on control, inspection, monitoring of PV-fields**
- **Persuasive Programming** for Climate protection
- **energy efficiency in buildings**
- **energy management (PV, Storage)**
- **Students and Lecturer's Exchange**

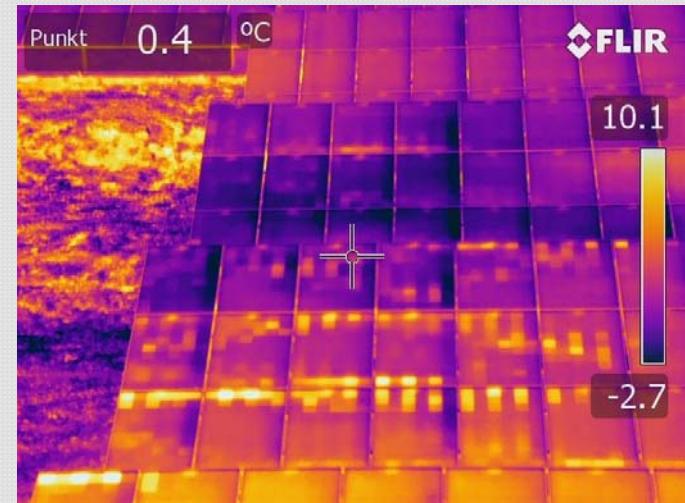

SCL-projects: Intelligent Data Analysis

- Bachelorthesis „Recognition of shadowing on PV-Modules with methods of Maschine Learning“
- Neuronale Network classifier
- Support vector maschine
- 98% recognitions rates on laboratory test site

Solar Computing Lab

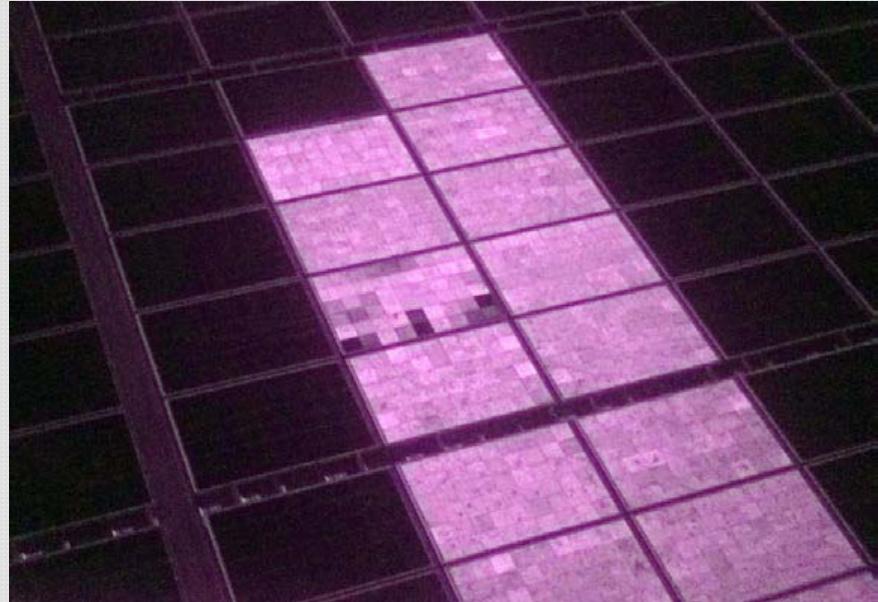

Outdoor-Test-Laboratory: Thermo-Drone

- Thermo-Drone for taking HR-infrared pictures from modules under working conditions
- Flight assistance over PV-modules on plants
- Image processing and recognition of failures like
 - shadowing, hot spots, wiring errors, surface crackings, and others

Solar Computing Lab

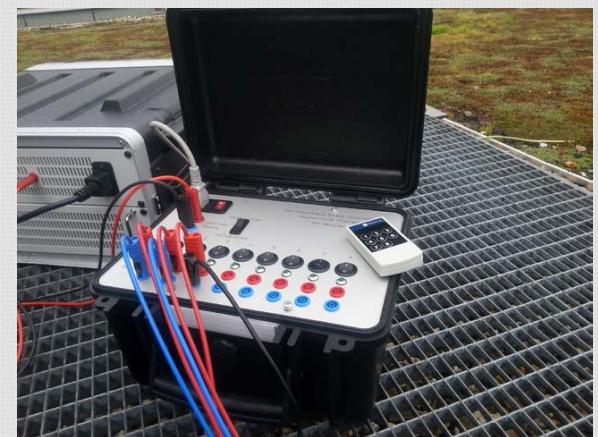

Detection of defect by-passdiode

Detection of defect by-passdiode

Outdoor-Test-Laboratory: Electroluminescence

- EL-Drone flying 15 m for taking pictures from PV-modules powered by switching string charging box
- Flight assistance over PV-modules on plants
- Image processing and recognition of failures like
 - PID (Potential induced degradation), defect bypass diodes, cell cracks, hailstorm damage

SCL – Student's Lectures

Internationality – ERASMUS exchange

- Internship students of Ecole Polytechnique Marseille, FRANCE (2012, 2013, ...2014)
- Solar Lab Technical University of Wroclaw (POLAND) docent and student exchange
- This Year from IZMIR, Turkey

Integration of laboratory activities in student lessons projects at Technical Faculty

- Computer science
- Industrial engineering
- Maschine engineering
- Electrical engineering
