

**Evaluation
of Intelligent Office Buildings
in the Cross-Cultural Context:**

**Getting Synergistic Effects
from the Integrative Framework
for International Building Performance Evaluation (IBPE)**

by Ulrich Schramm, Ph.D.

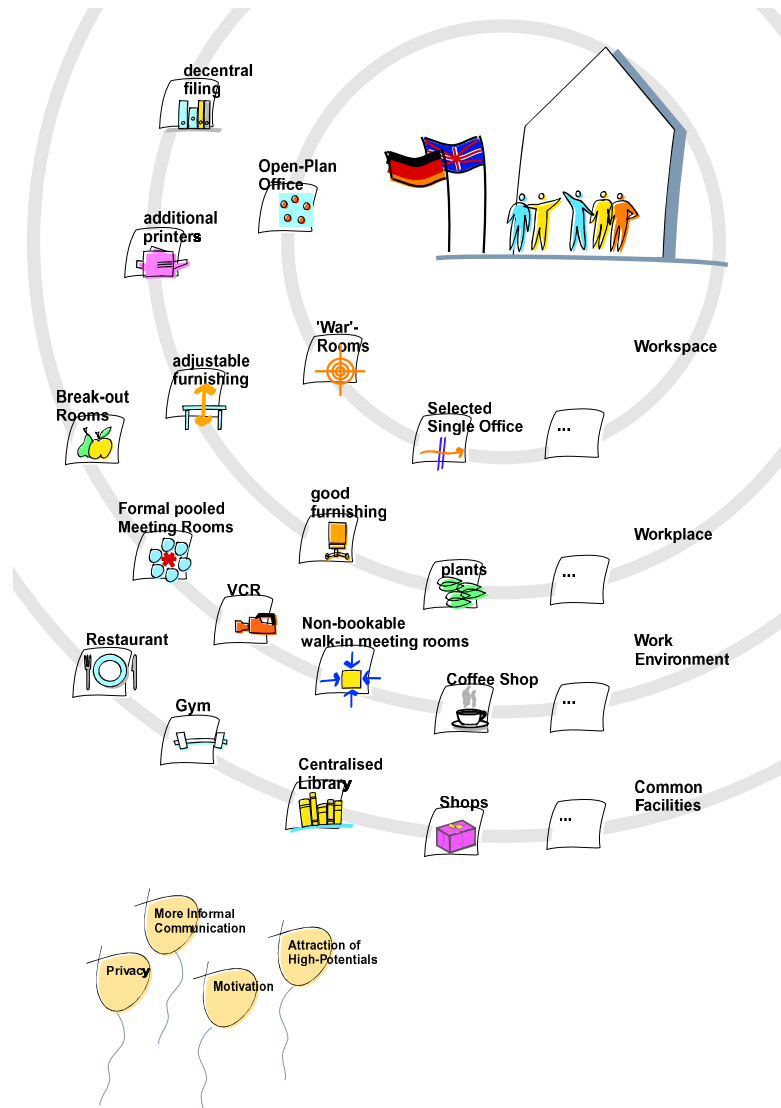

What are the goals of the presentation?

- to report on synergistic effects of three IBPE-case studies
- in terms of content: knowledge transfer on office buildings
- in terms of methodology: toolkit refinement/development for POE + Programming

What knowledge on office buildings could be fed forward?

- in terms of content: similarities between the 3 case-studies
- common failures in existing building performance (POE)
- user requirements - qualitative + quantitative (Programming)

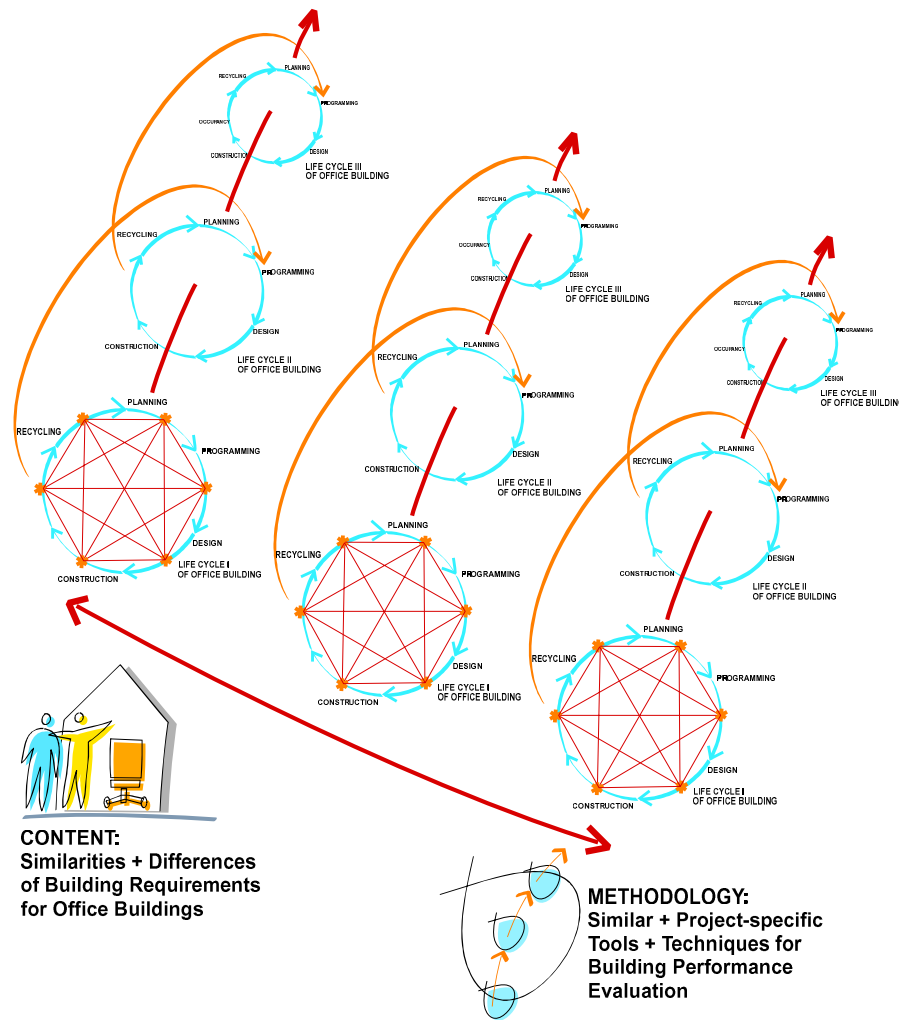

Which similarities in facility programmes could be considered?

- workspace: office organisation
- workplace: support + equipment
- work environment: informal + formal meetings
- common facilities: convenience + support

What knowledge on office buildings couldn't be fed forward?

- in terms of content: differences between the 3 case-studies
- specific requirements related to company's image + character, business + processes and user's culture + nationality

What could be summarized at the end of this presentation?

- integrative framework is beneficial
- synergistic effects could be gained in view of:
 - content: knowledge transfer on office building
 - methodology: toolkit refinement for POE, Programming etc.
