

**For our location in Bünde we are looking for a**

## **Dual Study Bachelor of Industrial Engineering (m/w/d)**

You want to gain practical experience during your studies? Then the practice-integrated degree program with us is just right for you!

### **Your Tasks**

- During the internship phases, we offer you the opportunity to familiarize yourself with our production processes and the operation of our modern machinery and to contribute to the further development of our technologies for the production of pharmaceutical packaging made of glass.
- Your main areas of responsibility will be in production, process optimization and development of processes and process monitoring using modern measurement technology.
- During the practical phases, you will receive professional and personal support on site. We will determine the specific tasks during your internship together and individually, take into account the requirements of the company and your personal interests.
- Subject areas: Lean production, continuous improvement processes (CIP), process optimization, Six Sigma projects, standardization
- Optional: parallel to your studies, training as an industrial mechanic (m/f/d)

### **Your Profile**

- You have obtained your A-Levels
- You have an understanding of science and are technically gifted
- You feel confident using a PC
- You enjoy working in a team

### **Benefit from our attractive employer benefits, such as:**

- We provide you with an exciting and application-oriented time and offer you an attractive salary
- We offer you comprehensive support and are happy to answer any questions you may have
- With us, you will have the opportunity to gain your first insight into the structures of a global industrial group
